

1. Which of the following lines are parallel? Calculate their slopes and use them to justify your answer.

2. Determine the equation of the line passing through the point $(-1,5)$ and perpendicular to the line with equation $y = -3x + 4$.

3. Determine the distance between the points $(2,-7)$ and $(5,9)$.

4. Determine the perimeter and the are of the following triangle.

5. Solve the following system of equations using a graph:

$$y = -2x + 3$$

$$y = 3x - 5$$
