

1. Solve the following inequalities using a graph.

a) $2y - 4x \leq 6$ and $y - 6x < -2$

b) $3x + 9y \geq 12$ and $x - 2y < 8$

2. Determine all missing angles. Justify each of the values using the rules for angles.

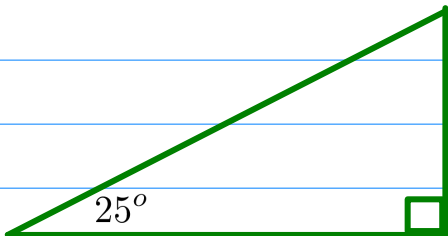

Conclusion

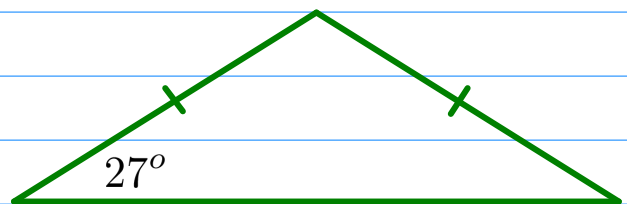

Reason

3. Determine all missing angles. Show ALL work.

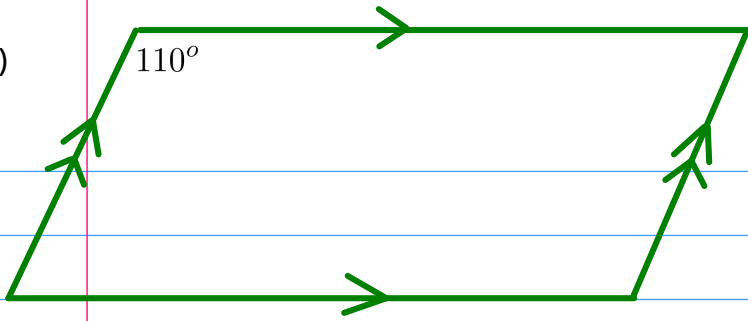

a)

b)

c)

d)
