

GED Math Assignment 8

Part 1

A. Find the volume of each object to the nearest unit.

1.

3.

5.

2.

4.

6.

7. Advertisers have designed this pyramid-shaped package to hold action figures.

8. The height of a cone is half the diameter of its base. If the cone's height is 4 inches, what is the cone's volume to the nearest cubic inch?

After testing the design, the manufacturer decides to increase both the length and width of the base by 4 cm. How many more cubic centimeters will the new package hold than the package shown above?

Part 2

A. Find the surface area of each object in square units. Use the formulas on page 402.

1.

3.

5.

2.

4.

6.

7. All the edges of a metal box are of equal length. If the surface area is 150 square inches, what is the length, in inches, of each edge of the box?
- A. 5
B. 6
C. 25
D. 50

9. If the dimensions of the box below are doubled, by how many square centimeters does the surface area increase?

- A. Find the surface area of each object in square units. Express your answer in terms of pi (for example, 36π). Use the formulas on page 404.

Part 3

- A. Find the perimeter and area of each figure.

(Hint: Think of the figure as a rectangle and a half circle.)

- B. Find the volume of each figure to the nearest cubic unit.
