Multiplication

Multiplication

Like addition, **multiplication** often requires regrouping. When a product of two digits is 10 or more, regroup to the next place value column. Multiply by the digit in the next place, then *add* the regrouped amount.

Example

Hide

Find the cost of 9 months of health insurance at \$428 a month.

Estimate first.

400

× 10

4000

Step 1

Multiply the ones. The product is 72 ones. Regroup 7 to the tens place.

7

\$428

× 9

2

Step 2

Multiply the tens. Add the regrouped 7.

2 × 9 = 18, and 18 + 7 = 25

Regroup 2 to the hundreds place.

27

\$428

× 9

52

Step 3

Multiply the hundreds. Add the regrouped 2.

4 × 9 = 36, and 36 + 2 = 38

27

\$428

× 9

\$3852

Check:

The answer **\$3,852** is close to your estimate of 4,000.
